

# GSP MATTERS FOR GEORGIA

The Generalized System of Preferences (GSP) program benefits American companies and workers by cutting tariffs (i.e., taxes) on certain products sourced from developing countries. In 2016, GSP saved American companies \$729 million, including \$36 million in waived tariffs on imports into Georgia. However, GSP will expire and companies in Georgia will face higher taxes unless Congress passes new legislation to renew GSP before December 31, 2017.

## GEORGIA COMPANIES IMPORTING UNDER GSP

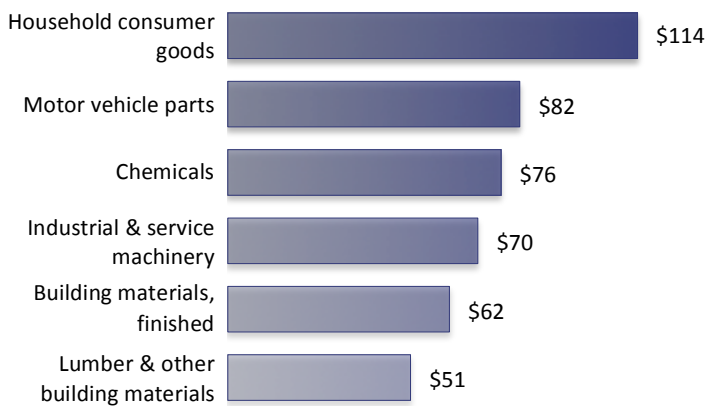

Source for all data is The Trade Partnership, supplemented by company import records from Panjiva.

## GEORGIA'S IMPORTS UNDER GSP

GSP eliminates tariffs on about 3,500 products. Most Georgia imports under GSP are raw materials and industrial goods whose duty-free treatment helps American companies remain competitive. About 59 percent of Georgia's tax savings from GSP come on imports from three countries: India, Thailand, and Brazil.

## GSP EXPIRATION HURTS AMERICAN COMPANIES AND WORKERS

The GSP program has a long history of expirations and retroactive renewals. Yet recent surveys show how damaging the expirations – and positive the renewals – can be for companies and workers that rely on GSP.

### Impacts on American Companies

#### GSP Expired <sup>A</sup>

Laid Off Workers /  
Delayed New Hires

**13% / 44%**

#### GSP Renewed <sup>B</sup>

Hired New  
Employees

**46%**

Delayed Capital  
Expenditures

**40%**

Made New Capital  
Investments

**41%**

Cut Employee Wages  
or Benefits

**22%**

Provided New (or  
Reinstated) Benefits

**23%**

GSP saved Georgia companies about \$210 million from 2011 to 2016. However, about \$100 million of that came while GSP was expired. So companies paid the taxes without knowing when – or if – Congress would renew GSP retroactively.

When GSP expires, the uncertainty causes many companies to take drastic steps, from laying off workers to delaying investments to cutting benefits, stunting growth and harming workers.

Only after GSP was renewed could companies start growing and investing again in their workers and communities. Even then, companies often wait over a year to receive all of their refunds.
